Charteris Treasury's Investment Risk Grades

You the client are required to select a risk grade for your investments. It is important that you tell us the average risk grade that should apply across your portfolio. Please insert the appropriate number on page one of the Investment Management Agreement.

1. I do not need my portfolio to take risks at all. Whilst I would like some growth or income, this should not be achieved by exposing the investments to any risk. I realise that returns will be very limited.
2. I want my investments to grow by more than I can achieve on deposit, however, I am only prepared to take minimal investment risks. I understand that the returns may not be great and may not always exceed that of deposit-based holdings.
3. I want my portfolio to benefit from partial exposure to stock markets. I would like a cautious approach and expect an average of 30% in equity-based investments and the remainder in more secure areas. I do not expect significant returns from the portfolio.
4. I can invest for several years and want to benefit from stock market exposure. I am relatively cautious and do not expect all of my investments to be held in volatile areas. An average of 40% exposure to equity-based investments would be acceptable.
5. I am a medium to long-term investor and I would like my portfolio to have a substantial exposure, when the managers deem appropriate, to stock markets. From time to time this may allow 60% of my funds to be in equity-based holdings, although I would like an element of caution to try and ensure that I do not suffer too greatly in times of market weakness.
6. I wish my portfolio to be invested mainly in equity markets. I understand that the portfolio is likely to exhibit volatility but I can either invest for the long term, or am prepared, or can afford to accept these risks in order to seek greater growth or income.
7. I am seeking a good level of growth or income from the equity markets. I am comfortable with all of my funds being invested in potentially volatile investments in order to seek the best long term returns.
8. I consider myself an experienced investor and am seeking strong returns from my portfolio. I am comfortable with stock market investment and would be happy for the manager to include particularly aggressive investments when it is felt suitable
9. I would like an aggressive portfolio, seeking strong growth over both the short and long term. I am happy for the portfolio to be actively and frequently traded in seeking opportunities which may be of substantially greater volatility than usual. I appreciate that the returns will be highly speculative and the chance of losses are great
10. I would like a very aggressively managed portfolio and give the managers complete freedom to invest as they choose. I expect frequent trading and high volatility in the value of individual holdings and the portfolio as a whole. In chasing exceptional returns, I understand the chances of loss are great

Your Investment Risk Grade can be changed at any time by mutual consent to be confirmed in writing
