Quarterly factsheet
31/12/25 - 31/03/26

Overview

Investment objective

The investment objective of the Fund is to provide an income yield and to attempt to preserve capital. The assets will be primarily invested directly through a mix of UK government bonds but can diversify into floating rate notes at the managers discretion. Money market instruments, corporate bonds, convertible bonds and cash deposits may also be held at the managers discretion, however the Fund will have a concentrated portfolio. There will be no hedging or borrowing as the Fund is long-only and the Fund will have no derivative exposure to aid with the efficient portfolio management of the Fund in accordance with the Regulations. The risk profile of the Fund is kept low through this approach.

Fund Manager's Comments

The Fund went down 2.37% on a total return basis in the first quarter of 2026.

The UK Gilt Market continued to suffer whilst geo-political uncertainties amassed during the reporting period.

This upward spike of yields particularly at the longer end of the curve have continued their trend for latter 2025. To help demonstrate that, the 30 Year Gilt is circa 5.5% which may look attractive to more passive income seeking investors at these levels compared to other foreign Government bond markets but also highlights greater risk at this part of the curve. To help minimise risk factors, the fund switched into an overweighted position towards the short end of the curve and has escaped much of the negative volatility which the sector as a whole has experienced.
